Professional Summary

Passionate software developer skilled in core Java, advanced JavaScript, Servlets, JSP, Spring Boot, HTML, CSS, and MongoDB. Experienced in developing and maintaining web applications with a strong focus on backend technologies. Proven ability in problem-solving and delivering high-quality solutions.

Education

+2 Graduate

Trinity International College, Kathmandu, Nepal

Technical Skills

- **Languages:** Java, JavaScript
 - **Web Technologies:** Servlets, JSP, HTML, CSS
 - **Frameworks:** Spring Boot
 - **Databases:** JDBC, SQL, MongoDB
 - **Tools:** Eclipse, VS Code, Git
 - **Other:** Bootstrap, Gson
-

Experience

- Developed web applications using Java, Servlets, and JSP.
 - Created RESTful APIs and microservices with Spring Boot.
 - Utilized JDBC and MongoDB for database operations.
 - Implemented real-time data integration using Google API for a money converter application.
 - Collaborated with cross-functional teams to ensure project success.
 - Troubleshoot and debugged issues across the application.
-

Projects

HamroBazar

- Developed a marketplace application for cars using core Java, Servlets, JSP, and Spring Boot.
- Integrated frontend and backend components to create a seamless user experience.
- Implemented database connectivity using JDBC and managed data with SQL and MongoDB.

Banksoftware

- Developed a banking software application using JDBC and Servlets.
- Managed user transactions and account information securely.

Money Converter

- Created a currency conversion application using real-time data from Google API.
- Implemented JSON data handling using Gson for efficient data parsing.

Achievements

- Won college inter and intra competitions.
- Participated in hackathons.

References

Available upon request.

Additional Information

- Open to relocation.
- Willing to work in dynamic and collaborative environments.
